SCGA On-Site Content Capture Policy

Participants

We love to see our participants share their experience on social media and other digital platforms. However, our goal is to ensure there is no disruption to play or anyone's personal space.

Guests with Camera or Video Equipment

If you plan to have someone onsite with camera or video equipment during play, you must contact the SCGA.

Content Capture Guidelines

All participant guests must abide by local state and spectator polies as they relate to general content capture, including the following:

- Anyone capturing content is not permitted on tee boxes, putting greens, or any area that constitutes "inside the ropes" location, which includes fairways and bunkers.
- Filming from directly behind the player or in a player's putting line in not permitted.
- Anyone capturing content must clear the line of sight for all others in the group between shots.
- Audio recording devices, including microphones and lapel mics, must not disrupt play or be used in a manner that compromises the privacy of fellow participants. Recording must cease upon request of any fellow participant, on-site staff or official.
- Aerial footage captured by drones or other unmanned aerial vehicles (UAV's) is strictly prohibited at all SCGA events.

Caddies

We love to see our participants, caddies and spectators share their experience on social media and other digital platforms. However, our goal is to ensure there is no disruption to play or anyone's personal space and that all caddies abide by the Rules of Golf.

Under no circumstances should caddies film or photograph players while on the course during a competition round.

Contact champs@scga.org with any questions or guidance.
